Summary

A well versed designer with over 10 years immersed in the design world and 6 years of professional User Experience Design work. I have a strong understanding of design process and methods that focus on the user and usability of products from a wide range of industries. Highly adaptable to any industry, I have spent the most time in the financial space working on enterprise software tools solving complex data presentation and long user flows. I have also worked on a wide range of consumer facing SaaS products and features in the in-flight entertainment industry.

I studied Industrial Design in college and have been educated in discovering needs of users, creating products that are intuitive and helpful with an emphasis on visual design. I have taken this education and enhanced it with an in depth UX/UI program and real professional experience working on digital products. I have always been a strong advocate for the user while also understanding the needs of a business and technical constraints. I have been mentored for leadership and lead junior designers through many projects and helped strengthen any team that I have been on.

Education

University of California, Irvine

Irvine, CA (May 2018)

UX/UI Certificate

California State University, Long Beach

Long Beach, CA (May 2014)

BA, Industrial Design

Skills

Experience

American Financial Network

October 2021 - Present

Brea, California (Remote)

A mortgage company where I worked on a design team of 3 designers and a design manager. Primarily designed for enterprise tools for the company's data analysis and HR functions. Managed the design process to create an interactive, data analysis, enterprise software tool that helped branch managers and leadership improve their understanding of their performance. Leveraged data visualization techniques to present complex data sets in intuitive and actionable formats, enhancing decision making processes and user experiences. Lead a UX design initiative to update internal hardware request forms and documents by creating a full web-based online shopping experience- including the back end of order fulfillment and accounting reports. Helped create a new Design System to update the dated UI of the company's web portal. Created interactive prototypes in Figma for delivery to the development teams

Safran Passenger Innovation

October 2019-October 2021

Brea, California (Remote)

An in-flight entertainment company with multiple SaaS products that were maintained and improved by our team of 4 designers. Mentored by our Design Manager for leadership skills and management. Acted as the primary Senior Designer and lead the design team in the managers absence. Lead collaborative design review sessions, communicating all design ideas and concepts to both internal and external stakeholders. Identified the users' and business needs and goals by working collaboratively with cross functional teams and stakeholders. Responsible for ownership of UX on projects and managing the creative process from briefing to final approval with business leaders. Developed wire frames and mock up screens using Figma, Adobe XD, Illustrator and Photoshop. Lead Design Sprints for new features to expand upon the existing product. Lead and mentor new hires and junior UX designers. Worked on efforts to improve the Data Analysis tool available to customers

Experience Continued

City National Bank

Los Angeles, California

October 2018-October 2019

Designed enterprise web tools for the loan processing department of a large banking operation. Worked on Agile Scrum teams as the primary UX designer on projects. Used Axure to create prototypes with high levels of interaction. Updated old PDF based processes to streamlined web based experiences to improve the productivity and efficiency of the loan officers and other bank employees. Solved complex data presentation and simplified complex workflows solutions. UX QA on the development team's work to ensure design and features are implemented as intended.

Trilogy Education

Freelance

August 2018-September 2018

Recommended by UCI Boot Camp instructor after completed the program to help develop a new web portal for the company's Career Services department and lead the design process from beginning to end. Worked directly with the Director of Career Services to understand the needs of the users and the business to create requirements. Lead a design sessions to create the project outline and expectations and scope of the final product. Develop UX/IA documentation including site maps and wire frames for presentation user testing. Create high fidelity, interactive prototypes for presentations using Adobe Illustrator and InVision. Designs were presented to CEO and approved by the business for funding and are in development.

Patton Design

Costa Mesa, California

March 2015-October 2018

Worked as Lead Designer at this consultancy under the CEO. Worked on a wide range of products and had to be able to research new areas and fields to quickly become an expert in the clients product and market including competitor research, user interviews, and usability tests. Worked on the industrial design of many medical devices and, as a result, began working on the UX and UI of the digital interfaces of these devices using Illustrator, Invision and Photoshop. Interact with clients directly for requirements gatherings meetings and serve as the point of contact for the internal team for relaying information and customer feedback. Present reports and design ideas to clients to explain ideas, strategies and tactics and justify how they achieve their goals with presentations created in Adobe InDesign.
